FROM THE DESK

Boring months are where alpha is decided

The headline reads like a bad month: benchmarks slipped, foreign money kept leaving, and the monsoon forecast added a layer of nerves. **But a falling index is a poor reason to change a plan** — and often a decent time to build one. The Nifty's P/E has drifted below its long-run average, and every prior instance of that over the last two decades was followed by positive returns one, two and three years out. That is not a promise. It is a reminder that the entry points people wish for in hindsight rarely feel comfortable in the moment.

Underneath the index, the dispersion was enormous. Small- and mid-caps quietly outran large-caps for the month, and the gap between the best and worst PMS in the same category ran to **double digits**. That gap is the whole argument for choosing a manager on process rather than on last quarter's chart. This brief deliberately does not list all 1,734 strategies — a wall of numbers flatters nobody. We show the funds that beat their benchmark, and we show a few that didn't, because both are the point.

One request we keep making: judge a PMS on the **3-year and 5-year** column before the 1-month one. Mean reversion in this space is brutal and impartial — it drags last year's winners back and lifts the

unfashionable. The funds worth your ₹50 lakh are the ones that beat the benchmark *across* cycles, not the ones having a good four weeks.

THE LIST WE'D ACTUALLY ACT ON

Alpha honour roll — beat the benchmark in every window

Strategies that outperformed S&P BSE 500 TRI across 1Y, 3Y and 5Y. Consistency across cycles is rarer — and more useful — than any single big number.

MANAGER · STRATEGY	CATEGORY	1Y	3Y	5Y	WINDOWS BEAT
Aequitas · India Opportunities	Smallcap	41.2%	41.1%	38.2%	3 / 3
Green Lantern · Growth Fund	Mid & Small	7.9%	37.9%	34.9%	3 / 3
Stallion Asset · Core Fund	Multicap	15.3%	39.1%	25.9%	3 / 3
Wallfort · Diversified Fund	Mid & Small	4.2%	38.1%	26.6%	3 / 3
Aditya Birla SL · Select Sector	Mid & Small	12.6%	27.6%	19.9%	3 / 3

REALITY CHECK

Last year's chart is not next year's return

Two funds, same lesson from opposite ends. One looks poor on a 1-year view but has compounded well over three. The other reads fine on brand recognition but has quietly lagged. Neither the recent number nor the famous name is the signal — the multi-cycle record is.

Equitree · Emerging Opportunities 1Y -6.9% 3Y +27.2%	Marcellus · Little Champs 1Y -6.8% 3Y +2.0%
